Art Unit: 3653,

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

2. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8 and 10-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Borgendale et al.

Borgendale et al discloses both the method and apparatus of sorting mail using a rekeying or 'post' OCR database to ascertain the intended address from the database when the initial address can not be ascertained. Borgendale et al's apparatus sorts to bins as is the conventional effect in postal processing. Borgendale et al's database also uses various fields, as noted in col2, lines 55-58.

4. Claims 9, 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Robinson is cited disclosing another type of mail sorting apparatus utilizing conventional sorting bins.
